

PriorityStart!®

PriorityStart! WORKS FOR YOU – IT DOES EXACTLY WHAT IT SAYS ON THE BOX.

PriorityStart! is an automatic heavy duty computerized on/off switching device designed to protect a battery, especially an engine-start battery and prevent costly jump-starts.

If the battery voltage drains below 11.7 volts when the engine is off, it automatically disconnects the load. The battery voltage immediately recovers.

PriorityStart! automatically reconnects the battery - any load greater than 0.2mV - when the headlight switch and/or the brake pedal is operated. No buttons or switches to operate.

No need for a battery booster unit. **PriorityStart!** is totally **automatic!**

Designed to handle 1000 starting amps, **PriorityStart!** is not a battery charger or booster often used after the battery has already been damaged.

No waiting for emergency services or calls for help. Stay safely in your vehicle. No lifting the bonnet or attaching dangerous jump leads. No buttons or switches to push. **PriorityStart!** pays for itself the first time it is used.

Using portable battery chargers/boosters, dangerous jump leads or calling a recovery service means you have already had a dead battery and done irreparable damage to your battery.

No hard wiring or modifications. Transferable. Certified to ISO, USCG and SAE standards. Maintenance free.

Fully automatic Always on Duty – Always Remembers – Provides you with Safety and Peace of Mind.

Vehicle Applications.

PriorityStart! works with almost all 12 volt batteries.

Perfect for:

Cars	Mobility Vehicles
Recreational Vehicles	Trucks
Van Conversions	Fleet Vehicles
Construction Vehicles	Motor Homes
Off Road Vehicles	Fork Lifts Trucks
Farm Vehicles	Industrial Vehicles

Also for marine use, mobility and available in 24 volt.

Easy to Install.

PriorityStart! attaches easily to any 12 volt vehicle battery.

Three Easy Connections:

1. Existing vehicle positive cable to **PriorityStart!**
2. **PriorityStart!** cable to battery positive post.
3. Attach ground wire to battery negative post.

Benefits.

Automatic Battery Reconnect – Convenient, Safe.

Easy to attach – 3 connections.

Maximizes Battery Life – Maintenance Free.

Handles 1000 Starting Amps.

Designed for Under-Bonnet Environment.

Engine Run & **Hazard Light Protection.**

Transferable from Vehicle to Vehicle.

Universal Design for all Batteries.

Ecologically friendly. Reduces number of batteries discarded into the environment.

Cost Savings.

Pays for itself the first time you use it; ready to protect every time you need it.

Reduces logistical costs and vehicle downtime.

Saves the cost of new battery and maybe the alternator.

Protects expensive vehicle electrical components.

Protects batteries from voltage spikes or surges.

Quality Product.

Meets numerous automotive specifications.

Manufactured using materials suited for under-bonnet environment.

One Year Warranty.

When engine or hazard lights are operating, patented circuitry prevents battery power from being switched off.
